

# Water Doctors™ DeChemilizer Water Filtration

The **Water Doctors** DeChemilizer Central Water Filtration Systems pre filter removes large particles from source water to protect and extend the life of the system.

Our filter can be used on municipal water sources to reduce unwanted tastes and odors associated with aesthetic chlorine. This pre filter utilizes the surface area of small granules to bind and contain trace chemicals, keeping them from entering your water supply. One cubic inch of granular Activated Carbon has a surface area equivalent to that of a 10 football fields. **Water Doctors** Central Water Filtration System incorporates over 1.5 cubic foot of filter media, equivalent to over 1700 football fields of surface area. This insures your family will enjoy many years of ultra filtered water.

## Convenient

- Ultra filtered water from every faucet in your home
- Eliminates the need for bottled water
- Automatic self-cleaning cycle
- Operates with existing water softeners`

## Unlimited Supply

- Ultra filtered water on demand for all household needs

- May help reduce Acne and Eczema
- Eliminates water odor and bad taste
- Reduces soap film build-up
- Leaves clean shower with no calcium or soap film build-up on glass doors or tiles

This Hand-Held Shower Filter will work for everyone who wants to eliminate harmful chemicals and stop breathing chlorine while taking a shower.

*While on "The Oprah Winfrey Show," Dr. Oz was demonstrating the value of filtering out chlorine in your shower while holding this shower filter under a Culligan brand.*

Anyone who has ever swum in a chlorinated pool realizes how harsh is chlorine on your skin and hair. What most people don't know is that typically there's as much or more chlorine in tap or shower water than there is in the pool. Chlorine strips natural protective oils from skin, causing excess dryness, and sometimes redness and itching. Free chlorine also evaporates and you breathe it in the shower. With a chlorine-removing shower filter you will notice significant cosmetically improvements - softer skin and silk hair! By elimination of chlorine and other chemicals from your shower with Paragon shower filters you will significantly reduce health risks that are caused by exposure to VOCs and THMs.
