The 500 GPD Reverse Osmosis Water Hub™ by Water Doctors is a centrally-located residential or workplace water purification solution that can simultaneously feed purified water to virtually any point-of-use location. In addition to the greater flexibility, the 500 GPD Reverse Osmosis Water Hub™ is proudly assembled in the USA and its approach provides a high level of efficiency by reducing the number of filter sets and drain lines that must be installed and maintained in any environment that requires multiple water dispense locations.
