

WATER DOCTORS
WATER TREATMENT COMPANY est. 1984

AIR
Capsule™

Our **Twin Capsule™ AIR INJECTION Iron Filter Katalox Light®** is a remarkable new iron removal media from Germany. This **LEAD -LAG** installation combines the versatility and high-performance characteristics of **Filox™** media with the lightweight properties of **Birm®**, resulting in a economical treatment option for high levels of iron, manganese, and hydrogen sulfide that is easy to backwash. This results in substantial water savings making Katalox Light® an ideal option for wells with low water yield. Like most iron removal medias, Katalox Light® acts as an insoluble catalyst to enhance the reaction between dissolved oxygen and the iron compounds to form ferric hydroxide which is then removed through mechanical filtration in the media bed. As a catalyst, Katalox Light® is not consumed in the iron removal process and it does not need to be regenerated. Also like most other iron removal media, the active ingredient in Katalox Light® is manganese dioxide. Katalox Light® is composed of a manganese dioxide coated zeolite, containing about 10% manganese dioxide, far higher than **Birm®** but less than **Filox™**.

Water Doctors proprietary stratified media is used for removing soluble iron, manganese, hydrogen sulfide, arsenic and radium from well water supplies.

Water Doctors together with our parent company HMI Water Specialists have over 35 years of experience in the water treatment business. We have established a reputation as the industry leader in providing the highest quality equipment in this very specialized field. We retain a staff of plumbers and technicians who have over 350 years of combined water service experience.

Advanced Features

- Minimal operating costs – **no chemicals for regeneration**
- Removes iron concentrations of up to 10 ppm/mg/L
- Only occasional backwashing required, conserving water as compared with conventional iron filters
- 3 models to choose from to fit any application
- Pentair** 2510SXT control with user friendly programming
- Fully adjustable regeneration cycles
- Bypass included with ¾" or 1" MNPT Connections
- Heavy Duty mineral tank (Lifetime Warranty)
- Electrical: 24V/60 Hz (120V to 24V wall mount)
- Class 2 transformer included)
